

Hint integrates process data acquisition and control systems with business systems, converting "real-time process data" into management information and business intelligence, to optimally run your plants and business processes.

Oil & Gas

- (Fiscal) Metering, process analyser applications and product loading, fully integrated with your information management layer applications.
- Retrieving and converting process data for environmental reports (Emission Monitoring), product allocation and shipment.
- Customers: Oil and gas upstream, on- and off-shore and downstream in refining and (petro) chemicals.

Process Automation

- Controlling and visualization of industrial processes and integrating these with management information layer applications.
- Tracking and tracing of people, products and the flow of goods.
- Translating management targets into strategies for the work floor.
- Access control.
- Customers: Process plants requiring control, alarm and visualisation for achieving production efficiency.

Office Automation

- Analysis, streamlining and optimization of business processes.
- Consolidation of data capture and presentation and integration with existing business information.
- Translate mission, vision and strategies into measurable performance parameters e.g. by using key performance indicators (KPI's) to allow performance monitoring at the management level.
- Real-time monitoring and control of business processes.
- Customers: Small and Medium Enterprises and business service providers.

Our Professionals

- Hint gives you access to a broad spectrum of professional consultants experienced in process and system analysis, research, design, engineering, training, support and maintenance.
- Our Professionals can be assigned per project as well as for short term studies and consultancy assignments.
- Customers: Oil, gas and the process industries.

One step beyond your imagination

Hint

Hint was founded in 1992 as a consulting company in Hattem (near Zwolle) in The Netherlands. In 1998 Hint started system integration activities in the chemical, petrochemical and process industries. Users include both national and international companies.

Hint as Consultant

Typical for Hint employees is their know how, experience, flexibility, innovativeness and passion for new technology.

With Hint as a consultant these characteristics are put to work for you.

We are striving for creative solutions, with the human aspect as central factor.

Hint as System Integrator

As a product independent system integrator, Hint integrates standard hardware and software from third parties with its own software and your software to a total solution. We focus on vertical and horizontal systems integration and logistics automation by integrating process data acquisition and control systems with business systems. We transform real time process and shop floor data into transaction based management information and business intelligence and we translate management targets into workable process and control strategies for the plant floor.

Hint as Service Provider

Hardware is subject to wear and can break down. Software can become slow and behave strangely. Hint employs a team of specialists for support and preventive maintenance to keep your systems running optimally and provide support if necessary. These specialists are available 24 hours a day, 7 days a week.

Our Vision and Mission

Industry is facing more stringent laws, regulations, and reporting requirements (e.g. emission monitoring, food safety) and needs to achieve better results with fewer people and resources.

The mission of Hint is to help you achieve this by optimising your business and / or industrial processes, by consultancy and by providing intelligent integrated automation solutions.

Results for you are:

- + Cost savings
- + Increased labour productivity
- + Increased customer satisfaction
- + Increased safety
- + Quality assurance
- + Compliance with regulatory law.

Standards

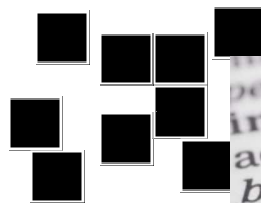

The team of Hint consists of qualified employees who are trained and accustomed to work in line with the applicable guidelines for Health, Safety and Environment and project management.

Hint employees are SCC (VCA) certified for work in industrial installations

- ISO 9001:2008 (Quality) Certified
- ISO 14001:2004 (Environmental) Compliant
- OHSAS 18001:1999 (Arbo) Compliant
- SCC / VCA (Safety, Health and Environment) Certified
